The following contributions for Lab 9 is as follows:

1) Andy Huelsman

- Completed HTTP parsing from the server to the website.

- Created separate display classes for each lab requirements labs

2) Steven Messer

- Completed CSS parsing from the server to the website.

- Allowed display results to output CSS style text so CSS works on the server and is read in by the browser

3) Michael Davis

- Completed CSS code from adjusting the table, alternating colors between rows, and set the font to sent to the website from the server.

4) Andrew Yehle

- Updated GUI for lab requirements and contributed to CSS code implementation
